***FOR IMMEDIATE RELEASE***

**FORHEALTH TECHNOLOGIES TRANSITIONS MANUFACTURING  
OF INTELLIFILL I.V. TO DELPHI MEDICAL SYSTEMS**

DAYTONA BEACH, Fla., December 28, 2004—ForHealth Technologies, Inc., a leader in automated devices for intravenous drug preparation, announced today that the company has successfully completed the transition for the manufacture of its flagship robotic technology IntelliFill i.v. from a California-based contract manufacturer to Delphi Medical Systems, a subsidiary of Delphi Corp. (NYSE: DPH). The first three devices built by Delphi Medical Systems Colorado Operations (formerly Peak Industries) were shipped to ForHealth’s headquarters in Daytona Beach, Fla. this month.

“We are delighted with our manufacturing partnership with Delphi Medical Systems, whose quality and documentation systems and reputation as a exemplary medical device contract manufacturer is unmatched,” said Wahid Khan, vice president R&D and Manufacturing of ForHealth Technologies, Inc. “The ability to convey all of the design documents from one manufacturer to another and replicate the IntelliFill i.v. device represents a significant milestone for ForHealth and assures the overall integrity of our design history and manufacturing instruction documents.”

IntelliFill i.v. automates the compounding and labeling of intravenous doses in syringes at speeds that can only be achieved through automated processes. By employing bar code scanning, vision systems and weight confirmation steps, and by providing final products that are identified with barcodes, IntelliFill i.v. reduces medication errors. Furthermore, by providing a Class 10 compounding environment, IntelliFill i.v. assures that the final i.v. product produced is of the highest quality. The system also promotes long-term hospital cost savings by preparing the final intravenous products in a syringe instead of an i.v. bag.

With more than five million patient-use syringes prepared in hospitals by its IntelliFill i.v. robots, ForHealth understands the rigorous requirements for accuracy, productivity and sterility. ForHealth's innovations are setting new standards for hospital pharmacies in patient safety, cost efficiency and compliance with new regulations such as U. S. Pharmacopoeia <797>. With over 24 US patents in process, ForHealth is well-positioned to continue to bring technological innovation to the i.v. compounding process.

"The partnership with Delphi Medical Systems guarantees that ForHealth's manufacturing requirements for at least the next three years can be handled by Delphi's outstanding capabilities," Khan said.

#### **About ForHealth Technologies, Inc.**

Founded in 1998, ForHealth Technologies, Inc. ([www.fhtinc.com](http://www.fhtinc.com)), a leader in automated devices for intravenous drug preparation, is committed to increasing patient safety and decreasing operating costs by automating the preparation of small-volume injectable medications in healthcare organizations worldwide. Offering safety, accuracy, efficiency and reliability, our IntelliFill i.v. automates the preparation of IV syringes, greatly enhancing both the safety of patients and the efficiency of hospital pharmacies.

#### **About Delphi Medical Systems**

Delphi Medical Systems is a world-class provider of technology, products, and product development and manufacturing for Dialysis, Infusion, Respiratory Care, Vital Signs Monitoring and Power Mobility. Its capabilities stem from Delphi's vast technology base, product development expertise and manufacturing excellence. For more information on Delphi Medical Systems, please visit its website at: [www.delphimedical.com](http://www.delphimedical.com).
